

NORVELL

Prepare for Norvell ® Air Brush Spray Tanning:

Exfoliate skin targeting dry areas within 24 hours prior to sunless session. It is important to remove dead cells for even coverage. Exfoliate lightly on delicate skin such as the face and neck.

Shave or Wax 24 hours prior to sunless treatment. Shaving acts as an exfoliant, doing so after will prematurely fade sunless results.

Clean skin of heavy beauty products including lotion, sprays, deodorant etc. Any product on the skin will create a barrier, remove make-up.

Wear dark, loose fitting clothes, like a sundress. Solution will wash out of most fabrics except nylon and silk. Wear a pair of flip flops if possible. Remove jewellery.

AFTER CARE:

Express Spray – no shower for 1 hour min to max 3 hours for dark colour

When you do rinse in the shower after your spray tan, use only warm water – no soaps, foams etc.. Do not scrub your skin, or rub dry with a towel...only pat dry. Immediately apply moisturizer. Apply moisturizer 2 x per day
